INSTRUCTIONS FOR STANDARD INSTALLATION

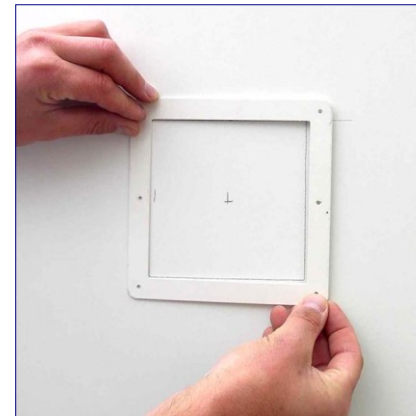

CLASSIC LINE 925

STANDARD INSTALLATION

1. Open the device unlatching the two levers. Take the underpart of the device out of the top piece, by unmounting the braces of the underpart.

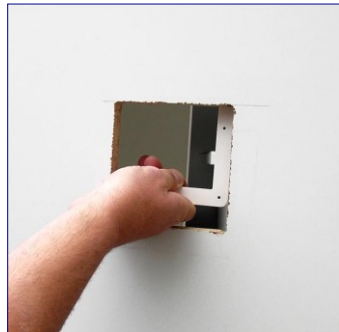

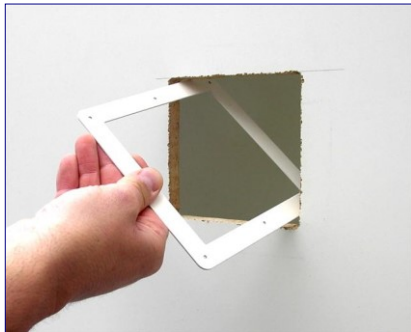

2. Draw via the provided clip-frame the desired cut-out of the diameter for the device.

STANDARD INSTALLATION

3. Set the frame in the cut-out sector and attach it with scotch tape to prevent the sliding away of the frame during installation.

4. Plug the transformer into the power socket (this should be found in the ceiling).
5. Plug the power point into the device.

STANDARD INSTALLATION

6. Maneuver the device, by holding it sideways (careful of power-plug), into the cut-out opening and attach the device with the provided screws to the ceiling.

7. Hang the underpart of the device back into the top piece.
8. Fill the device according to instructions in the user's guide.

INSTALLATION WITH THREADED RODS

CLASSIC LINE 925

INSTALLATION WITH THREADED RODS

1. Hold the clip-frame with the clips down (please mind the tag dots) and affix it with 4 screws (not provided in the delivery) to the holes underneath.
2. Attach to the ceiling with threaded rods (available on request) and also to the device.
3. Fill the device according to instructions in the user's guide.

INSTALLATION UNDER THE CEILING

CLASSIC LINE 925

INSTALLATION UNDER THE CEILING

1. Hold the clip-frame with the clips down (please mind the tag dots) and affix it with 4 screws (not provided in the delivery) to the holes underneath.
2. The unit can now be directly mounted to the ceiling.
3. Fill the device according to instructions in the user's guide.
